

Bridgewater Hebron Village District
Meeting minutes
12-12-12

Present Terry Murphy, Derry Riddle, Bill White, Architect Brackley Shaw, BPS Rep Keith Mcbey, Building contractor Joe Hogan.

Terry explained that ground work had been started; Morrison Contractors had moved the large underground tank. The Education Assoc had been billed for some of the contractor bills that were submitted directly. Keith stated that BPS would do a work change order for the invoices already paid. Invoices in the future should be sent directly to BPS.

The District would need certificate of insurance for all contractors working on the center. Keith said he would ask for them.

The District received 4 bids for the building phase of the center. After review of the bids Terry moved to accept Hogan Builders for the builder for the center. Bill seconded the motion.

Vote in favor.

Hogan Builders will work directly with BPS during the construction phase.

The Commissioners discussed the design of the center. Derry felt the center should be similar in color of the school. The roof line over hang should match the school, the corners should be metal, and doors green along with the trim, shingles similar to the school roof. BPS said for the next meeting they would bring samples to all the building materials that were discussed.
